***Allowable Subject Matter***

5. Claims **41, 43-67, 71-73 & 75-83** are allowed.

The following is an examiner's statement of reasons for allowance:

Bethea et al. teach a device comprising a plurality of quantum well element, each with a well layer having a well bottom, a well top, and bound energy states within said well, and first and second barrier layers surrounding said well layer.

However, Bethea et al. fail to teach or suggest that the well layers are formed of materials that cause a bound state to be resonant with the well top. Prior art of record fails to teach or suggest to incorporate these limitations into above reference to arrive at the claimed device.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
